# Sarah Matt MD, MBA
## *Vice President, Healthcare Markets*
## Oracle Health & AI

*Sarah Matt leads the Oracle Health & AI Healthcare Markets Product team. She is responsible for ensuring Oracle Health & AI can effectively compete in the global cloud healthcare market. She is guiding the business to develop the right services needed by our healthcare customers and build industry partnerships and relationships to overcome barriers to adoption.*

*Sarah's professional path has been an unusual one, beginning her career as an MD. She started on the clinical side of healthcare as a trained Surgeon with a Fellowship in burns. Throughout her career, while she has moved from the bedside to the tech side of healthcare, her commitments to better outcomes for patients, better solutions for providers and more efficient and effective healthcare systems have never faltered. Dr. Matt has spent much of her career on the app side of the house working with NextGen Healthcare in the acute and ambulatory spaces developing EMRs, patient portals, and native mobile solutions. Most recently she headed product management and UX at ESO, serving the prehospital market (paramedics, firefighters, state EMS). Sarah brings a wealth of experience not just in healthcare but in product management, product ops and strategy.*

*Sarah resides in Upstate NY and is found on the weekends hiking the woods of the finger lakes, and trout fishing with her family. Sarah still practices medicine and has been providing charity care for the uninsured for much of the last decade. Sarah received her BS in Biology from Cornell University, her MD from Upstate Medical University, and her MBA from the UT McCombs School of Business. She currently sits on the UT McCombs MBA Advisory Board and is an industry career consultant at UT, deeply involved in mentoring MBA students.*
